

Timetable

Individual schedule for the building projects

More LIFE to Level(s) as part of the European funding programme LIFE22 (LIFE22 PLP/PT/More LIFE to Levels/101104441)

Building/project: Alnatura Arbeitswelt
 Country: Germany
 Type: New build, in-use
 Office building

Deliveries

Delivery 1	Knowledge of Level(s) Framework <i>The following questions can be answered:</i> 1. "How you have trained yourself" (see page 2, we provide more information about Tools, Sources, and Information materials) 2. "How many hours it has taken you to do so."	<input type="checkbox"/>
Delivery 2	Preliminary Questions – Project information, experience, motivation More LIFE2Level(s) Initial survey I https://ec.europa.eu/eusurvey/runner/SurveyI	<input type="checkbox"/>
Delivery 3	Level(s) data report and survey <i>D3.1 Level 1 - report</i> - Data report More LIFE2Level(s) Level1 survey II https://ec.europa.eu/eusurvey/runner/SurveyII_L1 <i>D3.2 Level 2 - report</i> - Data report More LIFE2Level(s) Level2 survey III https://ec.europa.eu/eusurvey/runner/SurveyIII_L2 <i>D3.3 Level 3 - report</i> - Data report More LIFE2Level(s) Level3 survey IV https://ec.europa.eu/eusurvey/runner/SurveyIV_L3	<input type="checkbox"/>
Delivery 4	Final Framework - New understanding and further use. More LIFE2Level(s) Final survey V https://ec.europa.eu/eusurvey/runner/SurveyV	<input type="checkbox"/>

Timetable

Year	Year 1												Year 2														
Month	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27
Quarter	1			2			3			4			5			6			7			8			9		
Project name / month and year	Jun 23	Jul 23	Aug 23	Sep 23	Okt 23	Nov 23	Dez 23	Jan 24	Feb 24	März 24	Apr 24	Mai 24	Jun 24	Jul 24	Aug 24	Sep 24	Okt 24	Nov 24	Dez 24	Jan 25	Feb 25	März 25	Apr 25	Mai 25	Jun 25	Jul 25	Aug 25
1 Alnatura Arbeitswelt								D1	D2			D3.1					D3.2						D3.3			D4	

Additional information

Project goal

The goal of the project is to increase the use of Level(s) Framework. This should be achieved with the case studies. The individual application examples are intended to show the advantages of the applications. For this purpose, various questions must be answered, and experiences must be described. The questions generally refer to the different levels (Level 1, Level 2, and Level 3) as well as to the macro-objectives broken down to the indicators.

Information - Deliveries

The framework of the questionnaire is structured in three deliveries. A preliminary survey, building data and Levels reporting, and a final reflective survey.

Delivery 2: The preliminary survey is created based on relevant questions from the Level(s) user manual 2 and supplementary questions establishing a common baseline and will help users with project planning and workflow. This element is included in the data collection template. The objective of this survey is to understand details about the building, basic information about the insights regarding companies' status quo in dealing with the use of Level(s), and the motivation and expectations for participating. This questionnaire will be answered shortly after the official Kick-off of the case studies.

Delivery 3: Building data and Levels reporting
The second phase is directly linked to each building case individual Levels reporting data. Meaning that the objective is to investigate the usability of the Levels Framework and the building data and knowledge required to do so. The main data outcome of this phase is to gather knowledge through data validation indications. This Survey is included in the data collection template and is to be answered each time the Levels reporting template is used. The building documentation is collected through the folder structure which is directly linked to this phase.

For some projects, especially those that have already been completed, it is only possible to answer the questionnaire for Level1 and Level2 to a limited extent. In this case, it is sufficient to meet the indicators as much as possible. This should be possible, especially in the case of certified buildings.

Delivery 4: The final and reflective survey
This survey sums up the project and use of the Levels Framework. The objective is to understand the overall experience and value creation of using Levels along with its influence on decisionmaking. It intends to have the participants reflect on whether the preliminary expectations were met and on the influence that the Level(s) framework has had on the project and the decisionmaking process.

Support

MyDGNB <https://my.dgnb.de/> 

With myDGNB, the German Sustainable Building Council (DGNB) has created a unique digital networking platform for all those who want to work together on the transformation of the construction and real estate industry. There is a private group called "More LIFE to level(s)". This group serves as the communication hub for the EU-Project „More Life to Level(s)". Here you can post questions, answer questions, and provide feedback of your experience using the EU's Level(s) Framework or share documents. You also get access to protected downloads and specific news for our project.

This group is an exclusive group and access is by invitation only. The More Life to Level(s) project team and the case studies building project can view the content of this group.

The case studies run in various European countries at the same time, clear communication is important. Therefore, the communication rules should be applied so the project team can make sure to give timely responses to your questions.
